

Magex produces
with quality system
certified by

The Big Store Automated Intelligent Retail, or “Big Store AIR” kiosk, provides a striking way to expand your brands reach; all in a beautiful, cost effective manner with state-of-the art design features that includes a “No Drop” Robotic arm that gently picks up the product, delivers it and presents it to the Customers, all in a graceful motion.

The Big Store has a large single unit maximum capacity of up to 1680 products with its standard floor configuration. The world’s only Modular system doubling its capacity by adding a Product Display to the other side of the touch screen console. The Product Display can also be installed on site giving you the flexibility to build the client base and add more capacity when needed.

Big Store delivery system

- The Big Store is equipped with a Robotic Product Carrier system that transports the product from the kiosk display cabinet to the dispensing door.
- Maximum dispensing reliability thanks to the Magex sensors system on the Carrier which recognizes the product entering and exiting the kiosk display cabinet floor and the dispensing door..
- Total control of expensive items using a special microchip applied to the product that can be tracked at the dispensing door prior to the sale.
- Our Zero drop system and transport belt on the Robotic Product Carrier allows the sale of delicate products or products that require horizontal delivery.

Our software back-end provides diagnostics and kiosk management for efficient operational and organizational control. It is also flexible, having the ability to integrate with preferred payment gateways at the time of setup. Kiosk analytic’s and kiosk health information is sent over the internet to the server, allowing operations management complete control of real time status and performance of the machines.

Enterprise Remote Management

- Magex provides proprietary PC-Based operations
- Remote Management of "AIR" kiosks
- Remote monitoring of inventory and transactions in real-time
- Custom Email and Mobile alerts in real-time
- Remote management of media/advertising on the UI and digital signage.

Loading System Magex[®]

- The Big Store has maximum adaptability to distribute all types of products. With the unique lane system the kiosk can be paired with more than one lane that will automatically distribute products of different sizes.
- The system also has Patent Pending interlocking partitions to separate products that are next to one another. This allows complete control of specific lanes so you may dispense more than one size.
- The Big Store also has a self-diagnosis system that will check the operating status of the lane prior to any disbursement of the product.
