

The Easy Automated Intelligent Retail, or “Easy AIR” kiosk, provides a striking way to expand your brands reach; all in a beautiful, cost effective manner with state-of-the art design features that includes a “No Drop” Robotic elevator that gently transports the product, delivers it and presents it to the Customers, all in a graceful motion.

The Easy AIR has a small footprint that has a maximum Capacity of up to 1152 products with a 8 floor configuration. The world’s only Modular system doubling its capacity by adding a Product Display to the other side of the touch screen console. The Product Display can also be installed on site giving you the flexibility to build the client base and add more capacity when needed.

All our solutions includes software back-end which provides diagnostics and kiosk management for efficient operational and organizational control. It is also flexible, having the ability to integrate with preferred payment gateways at the time of setup. Kiosk analytic’s and kiosk health information is sent over the internet to the server, allowing operations management to have complete control of real time status and performance of the machines.

The Easy delivery system

- The Easy is equipped with a Robotic Product Carrier system that transports the product from the kiosk display cabinet to the middle dispensing door.
- Maximum dispensing reliability thanks to the Carriers’ sensors system which recognizes the product entering and exiting the display cabinet floor to the dispensing door.
- Our Zero drop system and transport belt on the Robotic Product Carrier allows the sale of delicate products or products that require horizontal delivery.

Enterprise Remote Management

- Magex provides proprietary PC-Based operations
- Remote Management of "AIR" kiosks
- Remote monitoring of inventory and transactions in real-time
